The Future Of PowerPoint

Import & Insert

The 123PPT Video Backgrounds Studio™ lets you import professional seamless looping video backgrounds from 123PPT.com, as well as your own video movies, clips and files for use as video backgrounds in your PowerPoint presentations.

Importing all major video file types including, .WMV, .MPG, .AVI, .MOV (Quicktime), .FLV (YouTube) and .123 (123PPT Video). The 123PPT Video Backgrounds Studio lets you use any imported video file as a video background upon any and all slides in PowerPoint.

Create & Control

More than simply allowing you to insert your video backgrounds behind your slide content, the 123PPT Video Backgrounds Studio provides you with a host of powerful tools, functions and features, to allow you to customize and control your video backgrounds precisely as you need.

Through the Insert Wizard function you can assign individual or multiple video backgrounds to individual slides, groups of slides, or across your entire presentation in 3 simple steps.

With controls that allow you to customize each slide and change aspect ratio, speed, transparency and even the color of your video backgrounds on each slide in real-time. The 123PPT Video Backgrounds Studio provides you with complete creative control.

Play & Share

The 123PPT Video Backgrounds Studio creates new play back controls that allow you to not only start your presentation from the first slide of your presentation, but from any slide, allowing you to customize play back and audience experience.

With sharing and distribution options that allow you to burn your presentation direct to CD, DVD or Blu-ray, or compile your presentation into an easy to distribute file or folder. Your full screen full motion PowerPoint presentation can be played on any pc, workstation or laptop computer and shared with friends, colleagues, customers or potential clients for free and without any need for additional licensing.
